**Allowable Subject Matter**

1. Original Claims 1-2, 4, 8-11, 13, 15 and 35 respectively are renumbered 1-10 respectively.

Original Claims 3, 5-7, 12, 14, and 16-34 are cancelled.

2. The following is an examiner's statement of reasons for allowance:

The Office has deemed Applicant's latest claim amendments and corresponding arguments persuasive to overcome the rejection under the prior art references with respect to the following amended claim features:

automatically determining a cause of the resource requirement, wherein determining the cause of the resource requirement further includes detecting an occurrence of a failure;  
retrieving a code associated with the determined cause from an electronic log;  
in response to retrieving the code, correlating the code to a charge indicator, wherein the charge indicator pertains at least in part to the determined cause, and wherein the charge indicator includes a reduced rate relative to another charge indicator that is correlated to another code that is associated with a cause other than a cause associated with an occurrence of a failure;  
in response to automatically determining the cause of the resource requirement,  
determining a duration of standby resource activation; and

Art Unit: 2151

determining the cost for using the standby resource according to charge indicator and the duration of standby resource activation such that the cost for using the standby resource is reduced relative to if the cause of the resource requirement was for other than an occurrence of a failure.

Specifically, Applicants argument that the present claims, and claim 1 in particular, indicate that a cause of the resource requirement is automatically determined, with claim 1 additionally reciting various limitations that are responsive to, dependent on, or associated with the determined cause, such as a code, charge indicator, and the cost of the standby resource activation, and that Abrams thus fails to disclose or suggest the automatic determination of a cause of the resource requirement, is found to be persuasive. Additionally, Applicant's argument that Abrams fails to disclose that determining a cause of the resource requirement includes detecting an occurrence of a failure, and that Abrams fails to detect anything other than a request from an application provider for more, or less, computational resources, is also found to be persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2151
